Material Transparency:

Clear

Adhesive Location:

Both sides

Special Features:

Description: 3/8 inches x 36 yds; tapes are made from silicone adhesive, used in applications at temperatures as low as -269 degrees c and as high as 260 degrees c, product is a combination of electrical, thermal, chemical and mechanical properties; applications: automotive sensor and manifolds, insulating circuit boards, etching, fiber optics cable, high temperature powder coating, semiconductor manufacturing, wave soldering during circuit board assembly

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:
