Overall Length:

177.996 inches

Overall Height:

96.000 inches

Overall Width:

267.996 inches

End Application:

Spawar-lant 55380/ussocom

Accessory Components And Quantity:

Troop entry door with secure combination/cipher lock, 1; rear escape hatch with openings for ecu ducts, 1; 36k btu ecu's, 2; 100a input for critical and non critical power circuits, 2; breaker panels (custom designed main and deployable panel/receptacle box for critical power distribution to equipment racks), 2; vestibule with canvas door to protect personnel access door, 1; alluminum powder coated cableway to prohibit communication interference, 1; opening for custom interface panel in ecu wall, 1

Current Rating:

100.000 amperes

Criticality Code Justification:

Agav

Product Name:

Hardside expandable lightair-mobile shelter (helams)

Special Features:

Color is desert tan; also includes high speed mobility wheel set, adapter set and sling chains; slide in/slide out 42,000 btu ecu; led lighting with blue led's with variable lighting dimming controls; outlets are included on the interior expandable panels; cable trays for communications wiring separate from the panduit used for electrical wiring on the roof panel; the 100 amp circuits (two) are separate such that one circuit is for critical equipment and the second circuit is for non critical equipment; retracted width is 8.000 feet; door quantity is 2; window quantity is 8; retracted length is 14.833 feet; specified use design is for communications purpose

Color:

Tan

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
