Product Name:

Si ballistic goggle kit

Special Features:

The soep spectacle kit provides protection for the operators eyes from ultraviolet (uv)(a)an (b) light, ballistic fragmentation/impact, required laser wavelengths, and variable light conditions while maintaing optical performance necessary to execute missions. The soep goggle is for use in high dirt/dust condition where a complete seal around the operators eyes is needed. The goggle provides ballistic and impact protection at higher levels than the spectacle set. Lens color is smoke. Carrying case is provided. Design type is single aperture.

Supplementary Features:

Polycarbonate plastic lens material; laser lens also provided

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
