Overall Length:

1.71 inches

Overall Width:

0.54 inches

Special Features:

The pouch that holds the splint pads are part of the oss spinal immobilization/extrication device. Placing the pads behind the patient's head as needed aids to fill the void between the back of the head (when in a neutral position) and the device. Splint pads ensure maintenance of the neutral in-line position when the head straps are later applied. Component of the casevac set, extraction kit, and the e-1 module.

Weight: 2.50 pounds; height: 0.02 inches;

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
