NSN 9135-00-782-2635

Nitrogen Propellant Pressurizing Agent - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/9135-00-782-2635

Unit Package Type:
Any acceptable
Composition And Percentage:
99.5 by weight nitrogen
Special Features:
Total hydrocarbons 5 ppm maximum by volume as methane moisture 11.4 ppm maximum by volume of water vapor at 70 degrees f and 760
mm of mercury pressure /-75 degrees f dew point/ particle and fibers count-none allowed larger than 175 microns
Specification Or Standard:
2 type
Departure From Cited Designator:
As modified by replies to special features
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
T095-c
