End Application:
Used as oxidizer in rocket engines
Composition And Percentage:
10.0 by weight nitric oxide and 11.0 by weight nitric oxide
Impurities Limitation In Percent:
("IM-PU-RIT-IESL
Special Handling Feature:
Poison a
Special Features:
Used as oxidizer in rocket engines; special handling feature: poison a
Color:
Green
General Description:
Composition nitrogen tetroxide min 88.8 pct by wt. Nitric oxide min by wt 10.0 pct and maximum by wt 11.0 pct. Chloride 0.040 maximum pc
by wt. Water equivalent 0.17 maximum pct by wt. Particulate maximum 10 mg per liter. Use 2000 lb cy nsn 8120-00-624-7339. Cy non
supplied
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
