Conductive Grease - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/9150-01-046-1345

General Description:

High termal and electrical conductivity. Silicon base grease containing silver and carbon materiels. Used in the an/grn-9a and 9b tacan beacons which have been modified to utilize the fel in., all band spectram filter cavity . This grease assures a positive rf contact at the point where a probe coupler makes contact with the preselector unit. Pack 1 gram (approx.1/3cc) in a 5 dram snap-cap bottle. Seal bottle with grease in a hermetically sealed bag
