Maximum Operating Temp:

500.0 degrees fahrenheit

Physical Form:

Any acceptable

Basic Ingredient:

Modified bentonite thickener

Service Characteristics:

Corrosion resistive and high temperature and acid resistant

Quantity Within Each Unit Package:

120.000 pounds

Special Features:

For centralized lubrication systems requiring high temperature capabilities, will not melt or run out below 500 degrees f, but requires frequent lubrication at temperatures above 300 degrees f, good pumpability characteristics and resistance to separation in centralized systems

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A41600
