Basic Ingredient:

Any acceptable

Minimum Viscosity Index:

91.0

Service Characteristics:

Salt water resistant and corrosion resistive and oxidation resistant

Quantity Within Each Unit Package:

55.000 gallons

Viscosity At Rated Temp:

975.00 100 degrees fahrenheit and 85.00 210 degrees fahrenheit

Maximum Pour Point:

10.00 degrees fahrenheit

Special Features:

May be used for turbine lubrication, hydraulic systems (particularly those with silver plated pump parts) machine tools, air compressors, roller bearings, sleeve bearings and circulating oil systems

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A41600
