End Application:

Metal, leather, wood, paint and plastic

Special Features:

Components potassium oleate/ammonium oleate, oleic acid, anthol, benzylacetate, benzylalcohol, amylalcohol and isobutylalcohol, purified liquid paraffin, isohexane; physical characteristics evaporationrate moderate at 68 degrees fahrenheit, melting t s .4 degree fahrenheit

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A41600
