Physical Form:

Paste

Service Characteristics:

Corrosion resistive and water resistant

Grease Type:

Electrically conductive

Effective Temperature Range Rating:

-70.0/+485.0 degrees fahrenheit

Product Name:

Circuit works silver conductive grease

Special Features:

Lubricates metal, rubber and plastic; contains pure silver

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A41600
