Basic Ingredient:

Synthetic oil

Melting Point Temperature Rating:

250.0 degrees celsius

Effective Temperature Range Rating:

-59.0/+260.0 degrees celsius

Vapor Pressure Maximum Temperature Rating:

20.0 degrees celsius

Special Features:

A chemical inert perfluoropolyether (pfpe) grease used in military applications including rotary and push button switches. Contains a pfpe soluble corrosion inhibitor for protection for lubricated parts while in use or long term storage. It is especially suitable for use in applications including electrical contacts, valves, threads, screws, bearings, and in systems employing elastomeric and plastic seals, gaskets, and o-ring. It is very inert, newly exposed rubbing surfaces of aluminum and magnesium may react with the grease under certain extreme conditions.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
