End Application:

Navy code 00615b405

Basic Ingredient:

Synthetic base

Melting Point Temperature Rating:

255.0 degrees celsius

Grease Type:

Electrically conductive

Effective Temperature Range Rating:

-40.0/+180.0 degrees celsius

Vapor Pressure Maximum Temperature Rating:

255.0 degrees celsius

Special Features:

Grease is an nlgi 1.5 grade w/iso vg 460 synthetic base; extreme pressure grease recommended for critical rolling element bearing applications

Supplementary Features:

Grease is contained in 12.5 oz cartridge

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A41600
