Physical Form:

Tube

Basic Ingredient:

Silicone

Quantity Within Each Unit Package:

0.330 ounces, fluid

Melting Point Temperature Rating:

300.0 degrees celsius

Grease Type:

Electrically conductive

Effective Temperature Range Rating:

-65.0/+400.0 degrees fahrenheit

Vapor Pressure Maximum Temperature Rating:

25.0 degrees celsius

Minimum Flash Point And Test Method:

200.0 degrees fahrenheit pensky-martens closed cup

Product Name:

Permatex dielectric tune-up grease

Special Features:

Improves electrical connections and prevents corrosion; used on spark plug boots, distributor cap nipples, battery terminals, and ignition coil connections.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A41600
