Fatty Material Type:

Mineral oil

Lubricant Type:

Worm gear

Product Name:

Super cylinder oil

Special Features:

High performance, high viscosity oil designed for use in all marine and industrial steam cylinder applications, protects against rust and corrosion, provides good sealing film strength, excellent lubricity and is resistant to water washout, excellent film integrity at high temperatures, excellent resistance to deposit formation at high temperatures, excellent antiwear and low friction properties, provides good sealing film around rods and in glands in steam applications

Supplementary Features:

Results in fewer unplanned stoppages and reduced maintenance costs, recommended for lubrication of steam cylinders, couplings, bearings, splash lubricated worm gear sets operating at moderate to high speeds and temperatures, and for the break in of copressors cylinders; this product is not expected to produce adverse effects on health when used for the intended application, following the recommendations provided in the material safety data sheet (msds); msds's are available upon request through your sales contract office, or via the internet on <http://www.Exxonmobil.Com>. This product should not be used for purposes other than its intended use; if disposing of used product, take care to protect the environment

Shelf Life:

N/a
