Basic Ingredient:

Gelling agent

Product Name:

Braycote 600 ef vacuum grease

Special Features:

Designed to operate in the presence of fuels, oxidizers, and in applications of deep space vacuum, used in gears ball and roller bearings, electrical contact and "o" rings, not recommended for use in applications under high vacuum with loads exceeding 100, 000 psi for extended periods of time

Supplementary Features:

Smooth, buttery, translucent, offwhite colored nlgj number 2 grease, uses castrol brayco 815z as the base fluid and tetrafluorethylene telomer as the gelling agent, grease is nonflammable, chemically inert and thermally stable and does not use any chlorofluorocarbons during product manufacture, exceptionally low volatility and has little tendency to form deposits, has excellent lubricating properties, good shear stability and low acute toxicity, castrol fluroclean tm x100 or castrol fluroclean tm he can be sued to remove this lubricant

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A41600
