Cross Sectional Shape:

Rectangular

Fabrication Method:

Cellular, unexploded

Nonmetallic Hardness Rating:

60.0 shore durometer a

Min. Tensile Strength (psi):

100 pounds per square inch

Surface Condition:

Porous both sides

Cross-sectional Height:

0.750 inches

Cross-sectional Width:

0.250 inches

Color:

Black both sides

Material:

Rubber, synthetic, cured

Material:

Rubber synthetic

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
