Cross Sectional Shape:

Circular

Fabrication Method:

Solid

Nonmetallic Hardness Rating:

45.0 shore durometer a

Min. Tensile Strength (psi):

800 pounds per square inch

Length:

Any acceptable

Surface Condition:

Smooth

Cross Section Outside Diameter:

Between 0.135 inches and 0.143 inches

Color:

Any acceptable

Material:

Rubber, synthetic

Material:

Rubber synthetic

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
