Cross Sectional Shape:

Triangular

Fabrication Method:

Solid

Nonmetallic Hardness Rating:

65.0 astm scale and 75.0 astm scale

Min. Tensile Strength (psi):

1700 pounds per square inch

Length:

4.000 inches

Surface Condition:

Smooth both sides

Cross-sectional Height:

0.120 inches

Environmental Protection:

Low temperature and heat, dry and oil resistant and tear and weather resistant

Material:

Rubber, ams 3209

Material:

Rubber chloroprene class cr

Material Specification:

Ams 3209 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
