Fabrication Method:

Cellular, exploded

Min. Tensile Strength (psi):

9 pounds per square inch

Width:

24.000 inches

Thickness:

2.000 inches

Length:

60.000 inches

Surface Condition:

Porous both sides

Environmental Protection:

Compression and fire resistant and bend fatigue resistant

Special Features:

Rubber, mil-r-20092, type ii, class 5, condition medium

Material:

Rubber, mil-r-20092, type ii, class 5, condition medium

Specification Or Standard:

5 class and medium condition and ii type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800

Mil-std (military Standard):

Mil-prf-20092 spec.
