Cross Sectional Shape:

Rectangular

Fabrication Method:

Solid

Nonmetallic Hardness Rating:

65.0 shore durometer a

Min. Tensile Strength (psi):

2500 pounds per square inch

Length:

6.875 inches

Surface Condition:

Smooth both sides

Cross-sectional Height:

0.375 inches

Cross-sectional Width:

Between 0.175 inches and 0.180 inches

Environmental Protection:

Abrasion resistant and fire resistant and low temperature and ozone resistant and tear and weather resistant

Material:

Rubber chloroprene class cr

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
