Fabrication Method:

Cellular, exploded

Min. Tensile Strength (psi):

5 pounds per square inch

Width:

36.000 inches

Thickness:

1.000 inches

Length:

60.000 inches

Surface Condition:

Porous both sides

Environmental Protection:

Fire resistant

Special Features:

Rubber, mil-r-0020092, type ii, class 5, condition medium

Material:

Rubber, mil-r-0020092, type ii, class 5, condition medium

Specification Or Standard:

5 class and medium condition and ii type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
