Cross Sectional Shape:

Rectangular

Fabrication Method:

Solid

Length:

96.062 inches

Surface Condition:

Smooth both sides

Cross-sectional Height:

0.625 inches

Cross-sectional Width:

0.056 inches

End Application:

Aircraft, rockwell international saberliner model ns265-80

Special Features:

Smooth finish

Color:

Red both sides

Material:

Rubber, synthetic, ams 3302

Material:

Rubber silicone class q

Material Specification:

Ams 3302 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
