Cross Sectional Shape:

Rectangular

Nonmetallic Hardness Rating:

92.0 shore durometer a

Min. Tensile Strength (psi):

5500 pounds per square inch

Temperature Rating:

-60.0 degrees fahrenheit and 200.0 degrees fahrenheit

Length:

4.000 inches

Surface Condition:

Smooth both sides

Cross-sectional Height:

4.000 inches

Cross-sectional Width:

0.062 inches

Material:

Plastic, polyurethane

Material:

Plastic polyurethane

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
