| Cross Sectional Shape:       |
|------------------------------|
| Rectangular                  |
| Nonmetallic Hardness Rating: |
| Not rated                    |
| Min. Tensile Strength (psi): |
| Not rated                    |
| Tempurature Rating:          |
| Not rated                    |
| Length:                      |
| 4.000 inches                 |
| Surface Condition:           |
| Smooth both sides            |
| Cross-sectional Height:      |
| 1.500 inches                 |
| Cross-sectional Width:       |
| 0.500 inches                 |
| Material:                    |
| Rubber, synthetic            |
| Material:                    |
| Rubber synthetic             |
| Shelf Life:                  |
| N/a                          |
| Unit Of Measure:             |
|                              |
| Demilitarization:            |
| No                           |
| Fiig:                        |
| A26800                       |
|                              |
|                              |
|                              |
