Cross Sectional Shape:

Rectangular

Nonmetallic Hardness Rating:

40.0 shore durometer a

Min. Tensile Strength (psi):

3046 pounds per square inch

Length:

5.550 inches

Surface Condition:

Smooth both sides

Cross-sectional Height:

5.000 inches

Cross-sectional Width:

0.125 inches

Environmental Protection:

Compression and heat resistant

Material:

Rubber, astm d2000, m4aa 421 a13b13k11 (m101)

Material:

Rubber, astm d2000, m4aa 421 a13b13k11 (m101)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
