Cross Sectional Shape:

Rectangular

Nonmetallic Hardness Rating:

10.0 shore durometer a

Min. Tensile Strength (psi):

900 pounds per square inch

Length:

0.900 inches

Surface Condition:

Smooth both sides

Cross-sectional Height:

0.700 inches

Cross-sectional Width:

0.200 inches

Environmental Protection:

Weather resistant

Special Features:

Boeing material spec. Grade 55, class 2

Material:

Rubber, synthetic

Material:

Rubber synthetic

Specification Data:

81205-bms 1-62 professional/industrial association specification

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
