Cross Sectional Shape:

D

Fabrication Method:

Any acceptable

Nonmetallic Hardness Rating:

45.0 shore durometer a

Min. Tensile Strength (psi):

1000 pounds per square inch

Temperature Rating:

-20.0 degrees fahrenheit and 130.0 degrees fahrenheit

Surface Condition:

Any acceptable both sides

Cross-sectional Height:

1.250 inches

Cross-sectional Width:

0.375 inches

End Application:

Navy equipment

Special Features:

Cut to fit

Material:

Rubber, vulcanized

Material:

Rubber

Specification Data:

81349-mil-prf-900f government specification

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800

Mil-std (military Standard):

Mil-prf-900f spec.
