Cross Sectional Shape:

Rectangular

Fabrication Method:

Extruded

Nonmetallic Hardness Rating:

20.0 shore durometer a

Length:

50.000 feet

Surface Condition:

Smooth both sides

Cross-sectional Height:

2.000 inches

Cross-sectional Width:

1.000 inches

End Application:

T-ags 63

Product Name:

Gasket

Special Features:

Two 45 degrees chamfer on one side the entire length

Color:

Black both sides

Material:

Neoprene compound

Material:

Neoprene compound

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
