Cross Sectional Shape:
Rectangular
Fabrication Method:
Extruded
Nonmetallic Hardness Rating:
20.0 shore durometer a
Length:
50.000 feet
Surface Condition:
Smooth both sides
Cross-sectional Height:
2.000 inches
Cross-sectional Width:
1.000 inches
End Application:
T-ags 63
Product Name:
Gasket
Special Features:
Two 45 degrees chamfer on one side the entire length
Color:
Black both sides
Material:
Neoprene compound
Material:
Neoprene compound
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A26800
