Cross Sectional Shape:

Circular

Nonmetallic Hardness Rating:

60.0 astm scale

Min. Tensile Strength (psi):

1000 pounds per square inch and 1500 pounds per square inch

Length:

3.000 inches

Surface Condition:

Smooth outside periphery

Cross Section Outside Diameter:

1.000 inches

End Application:

Use on 2590-01-119-0848 for recovery vehicle full track

Special Features:

Item is cut length wise, semi-circle used on the end item

Color:

Black one side

Material:

Rubber, chloroprene

Material:

Rubber chloroprene class cr

Specification Data:

81346-2bc610a14f19g21 professional/industrial association specification and 81346-2bc615a14f19g21 professional/industrial association specification

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
