Fabrication Method:

Cellular, exploded

Min. Tensile Strength (psi):

85 pounds per square inch

Width:

36.000 inches

Thickness:

0.250 inches

Environmental Protection:

Gasoline resistant and oil resistant

Strengthening Feature:

Backing

External Strengthening Feature Location:

One side

End Application:

Filter

Density Rating:

31.0 pounds per cubic foot and 39.0 pounds per cubic foot

Product Name:

Neoprene foam rubber

Special Features:

Meets astm d1056-90, mil-c-3133c, & mil-std 620b; temperature range of -40 to +150 degrees f; firmness rating is 4 to 5; elongation is 275%; compression (25% deflection) is 5 to 9 psi

Material:

Rubber, chloroprene

Material:

Rubber chloroprene class cr

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
