Cross Sectional Shape:

Rectangular

Nonmetallic Hardness Rating:

50.0 shore durometer a

Min. Tensile Strength (psi):

700 pounds per square inch

Temperature Rating:

-60.0 degrees fahrenheit and 500.0 degrees fahrenheit

Length:

36.000 inches

Surface Condition:

Smooth outside periphery

Cross-sectional Height:

0.063 inches

Cross-sectional Width:

1.000 inches

Material:

Silicone rubber and adhesive, pressure sensitive

Material:

Rubber silicone class q and adhesive

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
