Cross Sectional Shape:

Rectangular

Nonmetallic Hardness Rating:

60.0 shore durometer a

Min. Tensile Strength (psi):

2500 pounds per square inch

Temperature Rating:

-40.0 degrees fahrenheit and 220.0 degrees fahrenheit

Length:

36.00 inches

Surface Condition:

Smooth both sides

Cross-sectional Height:

0.125 inches

Cross-sectional Width:

2.00 inches

End Application:

1945-01-473-2162

Product Name:

Ultra-strength neoprene rubber

Special Features:

Cage 94519 is the oem/design control

Color:

Black both sides

Material:

Rubber chloroprene class cr

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
