Fabrication Method:

Rolled

Min. Tensile Strength (psi):

4900 pounds per square inch and 3800 pounds per square inch

Width:

20.000 inches

Thickness:

0.004 inches

Length:

13584.000 inches

Material Transparency:

Clear

Special Features:

Roll form, 9 in. O/a diameter of roll 3 in. Id of core, material treated on one side, treated side to be rolled

Color:

Clear both sides

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
