Min. Tensile Strength (psi):

5300 pounds per square inch

Width:

Between 39.750 inches and 40.250 inches

Thickness:

0.008 inches

Length:

Between 599.750 inches and 600.250 inches

Material Transparency:

Clear

Special Features:

High polish finish, chemical and weather resistant

Material:

Plastic, cellulose acetate

Material:

Plastic cellulose acetate

Specification Or Standard:

I type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A26800
