Fabrication Method:

Extruded

Min. Tensile Strength (psi):

9000 pounds per square inch

Width:

12.000 inches

Thickness:

0.020 inches

Length:

12.000 inches

Material Transparency:

Opaque

Special Features:

Light cream natural, heat resistant, wear resistant and weather resistant

Material:

Plastic, l-p-410, polyhexamethylenesebacamide, natural, with or without fillers

Material:

Plastic, l-p-410, polyhexamethylenesebacamide, natural, with or without fillers

Specification Or Standard:

Polyhexamethylene sebacamide composition and natural, with or without fillers

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
