Fabrication Method:

Extruded

Min. Tensile Strength (psi):

2500 pounds per square inch

Width:

Between 11.875 inches and 12.125 inches

Thickness:

0.060 inches

Length:

12.000 inches

Material Transparency:

Clear or translucent

Special Features:

Material fep fluorocarbon

Material:

Plastic

Material:

Plastic

Specification Or Standard:

1 class and i type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
