Fabrication Method:

Extruded

Min. Tensile Strength (psi):

12000 pounds per square inch

Width:

12.000 inches

Thickness:

0.188 inches

Length:

12.000 inches

Material Transparency:

Opaque

Special Features:

Light cream natural, heat resistant, wear resistant and weather resistant

Material:

Plastic, polyamide, polyhexamethylene adipamide, I-p-410

Material:

Plastic polyhexamethylene adipamide

Material Specification:

L-p-410 federal specification 1st material response

Specification Or Standard:

Polyhexamethylene apipamide, natural, with or without fillers composition

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A26800
