Fabrication Method:

Skived

Min. Tensile Strength (psi):

2800 pounds per square inch

Width:

Between 12.000 inches and 12.250 inches

Thickness:

0.015 inches

Length:

Between 12.000 inches and 12.250 inches

Special Features:

Smooth finish

Material:

Plastic, polytetrafluoroethylene

Material:

Plastic polytetrafluoroethylene

Specification Data:

81346-astm d3308 professional/industrial association standard

Specification Or Standard:

1 grade and ii type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800

Mil-std (military Standard):

Mil-p-22241 spec.
