**Min. Tensile Strength (psi):**

6000 pounds per square inch

**Width:**

24.000 inches

**Thickness:**

0.016 inches

**Length:**

24.000 inches

**End Application:**

Various

**Special Features:**

Cementable one side

**Material:**

Plastic, tfe, fluorocarbon, l-p-403, type 2

**Material:**

Plastic polytetrafluoroethylene

**Material Specification:**

L-p-403, type 2 federal specification 1st material response

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A26800
