Min. Tensile Strength (psi):

6000 pounds per square inch

Width:

24.000 inches

Thickness:

0.016 inches

Length:

24.000 inches

End Application:

Various

Special Features:

Cementable one side

Material:

Plastic, tfe, fluorocarbon, l-p-403, type 2

Material:

Plastic polytetrafluoroethylene

Material Specification:

L-p-403, type 2 federal specification 1st material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A26800
