Fabrication Method:

Extruded

Min. Tensile Strength (psi):

12000 pounds per square inch

Width:

24.000 inches

Thickness:

0.190 inches

Length:

48.000 inches

Material Transparency:

Translucent

Special Features:

Heat, wear, and weather resistant

Material:

Plastic, polyamide, polyhexamethylene adipamide, I-p-410

Material:

Plastic polyhexamethylene adipamide

Material Specification:

L-p-410 federal specification 1st material response

Specification Or Standard:

Polyhexamethylene adipamide, natural with or without fillers, wear resistant composition

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A26800
