Fire Retarding Characteristic:

Fire retarding

Width:

44.000 inches

Thickness:

8.000 inches

Length:

110.000 inches

Density Rating:

1.50 pounds per cubic foot

Compression Strength At 25 Pct Deflection:

Between 0.35 pounds per square inch and 0.60 pounds per square inch

Special Features:

Reticulated foam for explosion suppression a/c fuel tanks

Material:

Plastic, polyurethane

Material:

Plastic polyurethane

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T258-d
