Fabrication Method:

Extruded

Min. Tensile Strength (psi):

2500 pounds per square inch

Width:

Between 35.875 inches and 36.125 inches

Thickness:

0.001 inches

Length:

1200.000 inches

Material Transparency:

Clear or translucent

Special Features:

Material fep fluorocarbon

Material:

Plastic

Material:

Plastic

Specification Or Standard:

I type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
