Fabrication Method:

Extruded or molded

Min. Tensile Strength (psi):

2800 pounds per square inch

Width:

Between 47.875 inches and 48.125 inches

Thickness:

1.000 inches

Length:

Between 95.875 inches and 96.125 inches

Special Features:

Smooth finish

Material:

Plastic, l-p-512, type 1, class h, grade 1

Material:

Plastic, l-p-512, type 1, class h, grade 1

Specification Or Standard:

H class and 1 grade and i type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
