Min. Tensile Strength (psi):

8000 pounds per square inch

Width:

1.500 inches

Thickness:

0.250 inches

Length:

16.000 inches

Special Features:

Six 0.221 in. Diameter holes spaced equally 1/2 in. From each end

Material:

Plastic, acetal, I-p-392, type 1, class 2

Material:

Plastic polyethylene

Material Specification:

L-p-392, type 1, class 2 federal specification 1st material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A26800
