Fabrication Method:

Laminated

Width:

2.500 inches

Thickness:

0.120 inches

Length:

4.850 inches

Flexural Strength:

50000 pounds per square inch and 40000 pounds per square inch

Special Features:

Semi-gloss finish, four holes 0.201 in. Dia, 0.750 in. Radius cut out on one length side opposite holes

Material:

Plastic, mil-p-18177, type gee

Material:

Plastic

Material Specification:

Mil-p-18177, type gee military specification 1st material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800

Mil-std (military Standard):

Mil-p-18177 spec.
