Cross Sectional Shape:

Circular

Min. Tensile Strength (psi):

2800 pounds per square inch

Length:

0.250 inches

Surface Condition:

Smooth both sides

Cross Section Outside Diameter:

11.000 inches

Material:

Plastic, polyethylene, I-p-512

Material:

Plastic polyethylene

Material Specification:

L-p-512 federal specification 1st material response

Specification Or Standard:

H class and 1 grade and iii type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A26800
