**Cross Sectional Shape:**

Circular

**Min. Tensile Strength (psi):**

2800 pounds per square inch

**Length:**

0.250 inches

**Surface Condition:**

Smooth both sides

**Cross Section Outside Diameter:**

4.500 inches

**Material:**

Plastic, polyethylene, I-p-512

**Material:**

Plastic polyethylene

**Material Specification:**

L-p-512 federal specification 1st material response

**Specification Or Standard:**

H class and 1 grade and iii type

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A26800
